# Python/NumFOCUS News

2018-10-13

Python 3.7.1rc2 and 3.6.7rc2 now available for testing

## Xarray joins NumFOCUS Sponsored Projects

Sep 19, 2018 | Blog, Projects

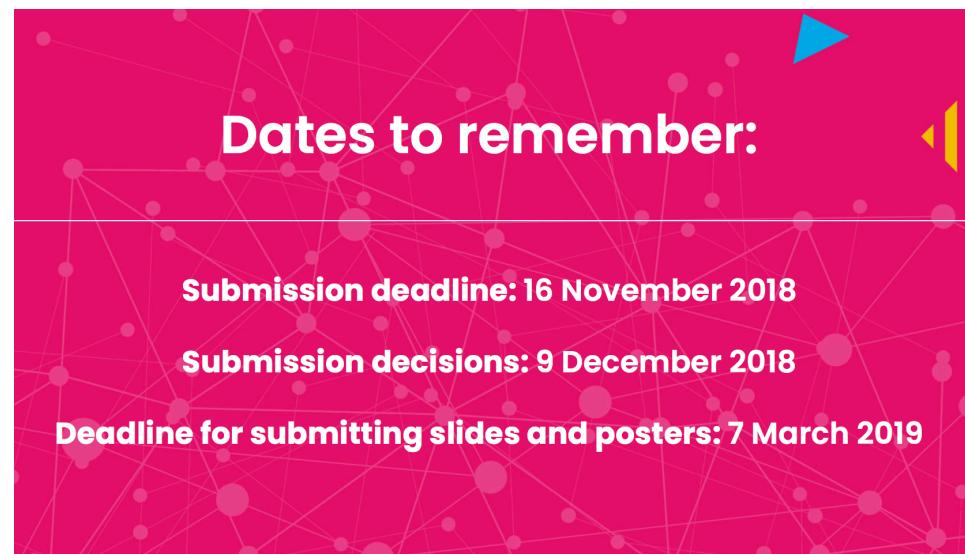

NumFOCUS is pleased to announce the newest addition to our fiscally sponsored projects: xarray. Xarray is an open source library providing high-level, easy-to-use data structures and analysis tools for working with multidimensional labeled datasets and...

<https://www.datafest.global/data-tech>

*DataTech19 aims to bring together members of industry, the public sector, and academia for technical presentations and discussions of important topics in data science, to share technical expertise, and engage in networking and collaboration. The conference will also serve as a forum to share emerging research in data science. Together we can help make Scotland the global centre of data.*

# SCOTCHAIN

8th November, RBS Gogarburn
